EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows: Please replace the abstract with the following:

--ABSTRACT

This invention is to provide a polymerizable composition having excellent curability and surface hardness, and a cured product thereof. A novel fumarate derivative having two or more fumarate groups within one molecule and ensuring copolymerizability with the terminal alkenyloxy group, a method for producing the derivative, a polymerizable composition containing the derivative, and a cured product thereof are provided.—

2. The amendment was made so that the abstract would be one paragraph long.

3. The following is an examiner's statement of reasons for allowance: it is noted that there are a number of X references cited on the international search report that have not been previously addressed. None of these references read on the claims as amended. Specifically, the Johansson et al. and GB 1,188,112 references fail to teach or suggest the presence of ether groups in the fumarate derivatives. The Klaban and US Patent

Art Unit: 1712

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
